**Period-2 Node.js, Express + JavaScript
Backend Testing**

Why would you consider a Scripting Language as JavaScript as your Backend Platform.

Explain Pros & Cons in using Node.js + Express to implement your Backend compared to a strategy using for example Java/JAX-RS/Tomcat

Compare, using relevant examples, the express strategy toward (server side) templating with the one you used with Java on <u>second</u> semester.

Explain, using relevant examples, the Express concept; middleware.

Explain, using relevant examples, how to implement sessions, and the legal implications of doing this.
